7. KAY® Specialty Cleaner & Polish

Procedure

1

Turn the toaster OFF.

Put on the heat-resistant gloves. Hot Surfaces

NOTE: Failure to wear gloves while performing this cleaning procedure can result in burns.

2

Remove the release sheet from the toaster and clean.

- Remove release sheet and place on a clean, flat and dry surface.
- Inspect the release sheet.
- Replace sheet if any tears or cracks are found or if excessive build-up cannot be removed.

NOTE: DO NOT fold or crease release sheet or take to the 3-compartment sink to be cleaned.

3

- Clean the entire surface of the release sheet.
- Immediately rinse the sheet with a clean, using a red boarder cloth.
- Flip the release sheet over and repeat cleaning instructions.
- Rinse this side of sheet.
- Re install release sheet after cleaning"

4

Check to see that 12.7 mm (1/2") of release sheet extends below each side of the platen.

NOTE: If 12.7 mm (1/2") of the release sheet does not extend below the bottom of the platen, then the sheet is not properly positioned.

NOTE: Make sure release sheet is completely dry before installing.
NOTE: When installing release sheet, you may flip inside-out and use the other side if needed.

5**Clean front and rear conveyor and club belts.**

- With power off, remove gloves from hands to unscrew and lift lid and open front conveyor door.
- Put heat-resistant gloves back on to clean.

**6**

- Using a red border cloth and sanitiser, clean the front main conveyor and club belts.
- Close front door, power unit ON, count 13 seconds to reveal unclean side of belt, power unit OFF, open door and repeat cleaning using the sanitizer-soaked towel.

**7**

- Repeat the belt cleaning process for rear main conveyor belt, rear club belt and rear inner panel.

**8**

- Close the conveyor access door and secure.
- Re-tighten top cover screws.

**9****Remove wire bun chute and clean.**

- Lift chute at an angle, lifting rear of chute and then pulling chute forward out of toaster.
- Clean following the 4 step cleaning method and allow to air dry.

**10****Clean landing zone and reinstall wire bun chute.**

- Spray a clean, sanitizersoaked towel with approved detergent solution or McDonald's DR Concentrate Disinfectant Cleaner.
- Using a red sanitised border cloth and match up cleaning solution clean the toaster bun landing zone.
- Spray all areas of the Pick-Up Zone with SolidSense Sanitizer and allow to air dry.

**11**

- Install wire bun chute by sliding the wire bun chute over the landing zone and into the toaster.
- Position the chute so that the rear of the chute is secured by 2 posts at the rear of the toaster.

NOTE: Front edge of the wire bun chute should be positioned at the edge of the toaster landing zone.

12

- Proper installation of wire bun chute is shown above right.
- Improper installation of wire bun chute is shown on the right.

14**Turn the toaster ON.**

Allow the toaster to warm up. The toaster is now ready to resume use.

**13****Clean exterior of the toaster.**

- Clean exterior of toaster unit and all parts with a clean, sanitizer-soaked towel sprayed with approved degreaser solution or McDonald's DR Concentrated Disinfectant Cleaner.
- Rinse exterior of unit using a clean, sanitizer-soaked towel.

NOTE: If streaking occurs, spray a paper towel with KAY Specialty Cleaner & Polish and wipe down to polish the
